## BTec National Extended Diploma in Applied Science

## Summer Independent Learning

## Y11-12

## Part 1 - Compulsory Content (pages 2-32)

There are 3 sections to the compulsory content (Biology, Physics and Chemistry)
For each section.

1. Watch the videos and complete the notes - you may consider adding flashcards / condensed notes, so you can use them to test yourself (metacognition)
2. Complete the follow up application questions
3. Where available, correct and improve questions (mark scheme at the end of the document)

This will be assessed in your initial assessment

## Part 2 - Highly Recommended (pages 33-41)

There are 3 sections to the highly recommended content (Biology, Physics and Chemistry)
Partial solutions (pages 41-60)

## Part 1 - Compulsory Content

BIOLOGY

## Cells and Microscopy

Q1. Label the cells below

## EUKARYOTIC CELL

PLANT CELL

## PROKARYOTIC CELL

Q2. Fill out the table with the strctures which make each specialised cell adapted to its function

| Specialised Cell | Characteristics |
| :---: | :---: |
| PLANT CELL |  |
| ROOT HAIR CELL |  |
| SPERM CELLS |  |
| EGG CELL |  |

WHITE BLOOD CELL

## Microscopy

Q3. When a cell was viewed with a light microscope the image of the cell nucleus had a diameter of 12 mm . The cell had been observed at a magnification of $X 200$. What was the actual size of the nucleus in $\mu \mathrm{m}$ ?

Q4. A red blood cell has a diameter of $8 \mu \mathrm{~m}$. A photograph of a red blood cell was taken using an optical microscope with a magnification of $X 1000$. What will the diameter of the cell be on the photograph in mm ?
$\qquad$
$\qquad$
Q5. A chloroplast has a diameter of $2 \mu \mathrm{~m}$. The image of a chloroplast observed using an optical microscope had a diameter of 20 mm . What was the magnification of the microscope used?

Q6. If a measurement is given in mm how can it be converted to $\mu \mathrm{m}$ ?

Q7. If a measurement is given in $\mu \mathrm{m}$ how can it be converted to mm ?

## Tissue Structure and Function

## Epithelial Tissue

Q1. Draw a diagram below of each type of epithelial tissue and label the key structures

| Type of epithelium | Diagram |
| :--- | :--- |
| Squamous |  |
|  |  |
|  |  |
| Ciliated |  |

## Muscle Tissue

Q2. Below are the three main types of muscle tissue. Describe where each is found.

| Type of Muscle Tissue | Location |
| :--- | :--- | :--- |
| Skeletal |  |

## Cardiac

## Smooth

Q3. List some of the key characteristics of fast twitch and slow twitch muscle fibres

| Fast Twitch | Slow Twitch |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |

Nervous Tissue

Q4. Label the diagram of a neuron

Q5. Identify the different types of neuron shown below and describe their function

|  | Type of Neuron | Function |
| :---: | :---: | :---: |
|  |  |  |
|  |  |  |
|  |  |  |

## APPLY

Q1.

Yeasts are microorganisms that are used in the brewing and baking industries.

The diagram shows a yeast cell.

(a) (i) State two ways in which the structure of this yeast cell differs from the structure of a bacterial cell.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

Q2.

Describe the functions of white blood cells.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Person $B$ has a low number of red blood cells compared to the healthy person.
Suggest an effect this may have on person B.

Q3.

The diagrams show the structure of two neurones A and B .

(a) Complete the sentences by putting a cross ( $\boxtimes$ ) in the box next to your answer.
(i) Neurone A is a
$\square$ A motor neurone
$\square$ B reflex neurone
$\square$ C relay neurone
$\square$ D sensory neurone
(ii) Neurone B sends information to the
$\square$ A brain and spinal cord
$\square$ B hormones which results in a response
$\square$ C muscle tissue
$\square$ D receptor cells in the skin
(b) Explain how information travels along the axon of a sensory neurone.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(c) Describe the role of the myelin sheath.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## PHYSICS -

NOTES (recall)
Watch the following videos and complete the notes on waves:
You may also wish to refer to BBC bitesize (link)
You don't need to include any derivations of formulae.

## Wave basics (link)

1. Define a mechanical wave and provide two examples
2. Define an electromagnetic wave and provide the names of two frequency bands
3. Complete the sentence for the definition of waves

Waves transfer $\qquad$ without the transferring $\qquad$

Wavelength, Period, Amplitude and Phase Difference (link)

1. a. Complete the sentence for the transverse waves:

The oscillations of the medium are parallel / perpendicular to the direction of energy transfer.
b. Add labels (wavelength, amplitude $\times 2$ and period) for the diagrams of transverse waves:

2. a. Complete the sentence for the longitudinal waves:

The oscillations of the medium are parallel / perpendicular to the direction of energy transfer.
b. Add labels (compression, rarefaction and wavelength) for the diagram of a longitudinal waves:

[try the simulation of a longitudinal wave https://ophysics.com/w5.html]

## The wave equation (link)

1. State the equation linking the frequency, $f$, (the number of cycles per second) and the time period of a wave, $T$ (the time taken for a complete cycle).
2. Provide the unit for frequency $\qquad$
3. State the wave equation which links the wave speed, $v$, the frequency of a wave, $f$, and the wavelength, $\lambda$.

## APPLY - QUESTIONS

Use the graph to answer the following questions:

1. Provide the amplitude of the wave.
2. Provide the time period of the wave.
3. Calculate the frequency of the wave.
4. Complete the missing values in the table below provided that $f=1 / T$ :

| $\mathrm{f} / \mathrm{Hz}$ | $\mathrm{T} / \mathrm{s}$ |
| :---: | :---: |
|  | 2 |
|  | 5 |
|  | 10 |
|  | 2.8 |
|  | 0.6 |
|  | 36.5 |
|  | $8 \times 10^{-5}$ |
|  | 0.094 |
|  | 86400 |

| $\mathrm{f} / \mathrm{Hz}$ | $\mathrm{T} / \mathrm{s}$ |
| :---: | :---: |
| 4 |  |
| 20 |  |
| 50 |  |
| 7.2 |  |
| 0.005 |  |
| 28 |  |
| $7 \times 10^{13}$ |  |
| 3200 |  |
| $6.5 \times 10^{-6}$ |  |

5. Complete the missing values in the table below provided $v=f \times \lambda$ :

| $\mathrm{v} / \mathrm{m} / \mathrm{s}$ | $\mathrm{f} / \mathrm{Hz}$ | $\lambda / \mathrm{m}$ |
| :---: | :---: | :---: |
|  | 2 | 12 |
|  | 125 | 20 |
|  | 15 | 3 |
| 7 |  | 0.3 |
| 5 |  | 0.4 |
| 8 |  | 24 |
| 256 | 25 |  |
| 330 | 450 |  |
| 7500 | 350 |  |

| $v / \mathrm{m} / \mathrm{s}$ | $\mathrm{f} / \mathrm{Hz}$ | $\lambda / \mathrm{m}$ |
| :---: | :---: | :---: |
|  | 1.2 | 256 |
|  | 360000 | 0.0004 |
|  | 2.9 | 5.7 |
| 400 |  | 1500 |
| $3.0 \times 10^{8}$ |  | $7.5 \times 10^{-7}$ |
| $3.8 \times 10^{5}$ |  | 0.25 |
| 215 | 525 |  |
| $3.0 \times 10^{8}$ | $7 \times 10^{14}$ |  |
| 0.036 | 57 |  |

6. Provide two example calculations for the above showing your workings below.

Q1. (a) Which one of the following is not an electromagnetic wave?
Tick one box.

(b) What type of electromagnetic wave do our eyes detect?
$\qquad$
(c) What is a practical use for infrared waves?

Tick one box.

Cooking food

Energy efficient lamps $\square$ Satellite communications $\square$

Scientists have detected radio waves emitted from a distant galaxy.
Some of the radio waves from the distant galaxy have a frequency of 1200000000 hertz.
(d) Which is the same as 1200000000 hertz?

Tick one box.
1.2 gigahertz

1.2 kilohertz

1.2 megahertz

1.2 millihertz

(e) Radio waves travel through space at 300000 kilometres per second $(\mathrm{km} / \mathrm{s})$. How is $300000 \mathrm{~km} / \mathrm{s}$ converted to metres per second (m/s)?
Tick one box.
$300000 \div 1000=300 \mathrm{~m} / \mathrm{s}$

$300000 \times 1000=300000000 \mathrm{~m} / \mathrm{s}$

$300000+1000=301000 \mathrm{~m} / \mathrm{s}$

$300000-1000=299000 \mathrm{~m} / \mathrm{s}$

(f) Write the equation which links frequency, wavelength and wave speed.
$\qquad$
(g) Calculate the wavelength of the radio waves emitted from the distant galaxy.

Give your answer in metres.
$\qquad$
$\qquad$
$\qquad$
wavelength $=$ $\qquad$ m

Q2. The figure below shows an incomplete electromagnetic spectrum.
A microwaves B C ultraviolet D gamma
(a) What name is given to the group of waves at the position labelled $\mathbf{A}$ in the figure above? Tick one box.

| infrared | $\square$ | visible light |
| :--- | :--- | :--- |
| radio | $\square$ |  |
|  |  | X-ray |

(b) Electromagnetic waves have many practical uses.

Draw one line from each type of electromagnetic wave to its use.
Electromagnetic wave
Use

For communicating with a satellite

Microwaves

> To see security markings
Ultraviolet
(c) Complete the sentence.

Use an answer from the box.

| black body | ionising | nuclear |
| :--- | :--- | :--- |

X-rays can be dangerous to people because X-rays are
$\qquad$ radiation.

## WAVES ON A STRING UNDER TENSION

1. Wave pulses are sent along two wires subjected to the same tension. One wire is a thin nylon wire, the other is a thick rope. On which rope do you think pulses will move fastest?
$\qquad$
$\qquad$
thin nylon wire

thick rope
The equation for the speed, $v$, of a wave on a string on mass per unit length, $\mu$, under a tension, $T$, is:

$$
v=\sqrt{\frac{T}{\mu}}
$$

2. Calculate the mass per unit length $\mu=m / l$, where, $m$, is the string mass and, $l$, is a given length for the two wires.

|  | $\boldsymbol{m} / \mathbf{k g}$ | $\boldsymbol{l} / \mathbf{m}$ | $\boldsymbol{\mu} / \mathbf{k g} / \mathbf{m}$ |
| ---: | :---: | :---: | :---: |
| nylon wire | 0.00080 | 2.0 |  |
| rope | 0.0040 | 1.0 |  |

3. Both strings are held with a tension of 4.0 N . Calculate the wave speed of:
a. Pulses on the nylon wire.
b. Pulses on the rope.

4 Did you answer agree with your prediction?
5. The tension is increased to 8.0 N calculate the new wave speed for.
a. Pulses on the nylon wire.
b. Pulses on the rope.
6. Describe how increasing the tension changes the speed of a wave on a string.

## WAVES IN COMMUNICATION

Electromagnetic waves enable devices to be connected and are the bedrock of modern communication. These wireless connections occur over multiple frequency bands.

Some methods of wireless information transfer are listed below

Using your existing knowledge, which of the frequency bands:

1. Communicate between a remote control and a television?
2. Communicate between two mobile phones?
3. Communicate between a satellite and a satellite dish?
4. Communicate between a radio tower and an FM radio?
5. Communicate between a wireless router and a laptop?
6. Communicate between a mobile phone and some wireless earbuds?
7. Has the longest wavelength ? ${ }^{1}$
8. Has the shortest wavelength?
9. Is reflected by the ionosphere?

## NOTES (preview)

Watch the following videos and complete the notes on waves:

## Optical fibres

Watch the video on refraction (link) optical fibres (link1, link2) and answer the following questions:

1. Link the correct term to the correct description:

## Refraction

Reflection

Diffraction

The spreading of a wave as it passes through a gap or a past an obstacle.

The change in direction of a wave as it passes through the interface between two different materials.

The change in direction of a wavefront at an interface between two different media so that the wavefront returns into the medium from which it originated.
2. Describe total internal reflection
3. Describe how total internal reflection is used in optical fibres.
4. Sketch the path of one light ray as it propagates along an optical fibre.

## CHEMISTRY

## Unit 1: Principles and Applications of Science I

Answer all the questions. There are links to websites which you may find helpful. You will be given a test on these concepts at the start of the term.

This unit covers some of the key science concepts in biology, chemistry and physics.
This section looks at some of the chemistry concepts you have covered at GCSE and will cover in more depth in Unit 1.

## Periodicity and properties of elements

## $\square$ Atomic Structure

https://www.bbc.co.uk/bitesize/guides/zwn8b82/revision/3 (pages 3,4 and 5)
https://phet.colorado.edu/sims/html/build-an-atom/latest/build-an-atom en.html
Q1. Figure 1 shows an atom of element $\mathbf{G}$.
Figure 1

Draw a ring around the correct answer to complete each sentence.
(a) Label $\mathbf{A}$ shows an electron an ion a nucleus (1)
(b) Label B shows an isotope a molecule a neutron
(1)
(c) The atomic number of element $\mathbf{G}$ is
(d) The mass number of element $\mathbf{G}$ is
$\begin{array}{lllll}5 & 6 & 10 & 11 & 16\end{array}$

## - Periodic Table

https://www.bbc.co.uk/bitesize/guides/ztv797h/revision/2 (pages 2-8)
https://www.rsc.org/periodic-table/

Q2. The Periodic table below contains six errors. Highlight these.

Q3. Complete the labels on the diagram below using the following terms:
period
Alkali metals

Q4. Read the information below on element $\mathbf{X}$ carefully. Use this to help you answer the questions which follow.

Element $\mathbf{X}$ has two different isotopes, both of which contain 17 protons. The least abundant isotope contains 20 neutrons. The second isotope is three time more abundant and contains 2 more neutrons. All the atoms contain 2 electrons in the first shell, 8 electrons in the second shell and 7 electrons in the third.
(a) Where in the Periodic Table is element $\mathbf{X}$ found:

Group:
Period:
(b) Use the Periodic Table in Q3. the key and your answer to Q4.(a) to complete Figure 2. for element $\mathbf{X}$

(c) Is element $\mathbf{X}$ a metal or non-metal?
(d) Identify an element, in the same group as $\mathbf{X}$, which has a lower boiling point than $\mathbf{X}$.

## - Chemical reactions and equations

## https://www.bbc.co.uk/bitesize/guides/zy4pmsg/revision/1 <br> (pages 1-6) <br> https://www.bbc.co.uk/bitesize/guides/z2bfxfr/revision/1 (pages 1,2)

Equations are used to show chemical reactions.
Reactants are written on the left of the arrow and products are written on the right.
For example:

Atoms cannot be created or destroyed. They are simply rearranged. Therefore, the equation with formulae needs balancing. (You can only add more of the same molecules. You cannot change the formula of any.)

The relative formula mass of a molecule/compound $\left(M_{r}\right)$ can be calculated by adding the $A_{r}$ of all the atoms it contains. The $A_{r}$ value for all elements can be found in the Periodic Table.
$\mathrm{A}_{r}$ of C is $12.0, \mathrm{~A}_{r}$ of H is 1.0 and $\mathrm{A}_{r}$ of O is 16.0
$\mathrm{M}_{\mathrm{r}}$ of $\mathrm{C}_{2} \mathrm{H}_{6}=(2 \times 12.0)+(6 \times 1.0)=30.0$

$$
\begin{aligned}
& M_{r} \text { of } O_{2}=(2 \times 16.0)=32.0 \\
& M_{r} \text { of } \mathrm{H}_{2} \mathrm{O}=(2 \times 1.0)+16.0=18.0
\end{aligned}
$$

$\mathrm{M}_{\mathrm{r}}$ of $\mathrm{CO}_{2}=12.0+(2 \times 16.0)=44.0$
The total mass of the reactants $=$ the total mass of the products
Mass of reactants $=\left(2 \times \mathrm{M}_{\mathrm{r}} \mathrm{C}_{2} \mathrm{H}_{6}\right)+\left(7 \times \mathrm{M}_{\mathrm{r}} \mathrm{O}_{2}\right)=(2 \times 30.0)+(7 \times 32.0)=284.0$
Mass of products $=\left(4 \times \mathrm{M}_{\mathrm{r}} \mathrm{CO}_{2}\right)+\left(6 \times \mathrm{M}_{\mathrm{r}} \mathrm{H}_{2} \mathrm{O}\right)=(4 \times 44.0)+(6 \times 18.0)=284.0$
Q5. Lithium reacts with water to form lithium hydroxide and hydrogen.
(a) Balance the symbol equation for this reaction

Li(s) + $\qquad$ $\mathrm{H}_{2} \mathrm{O}(\mathrm{I}) \rightarrow$ $\qquad$ $\mathrm{LiOH}(\mathrm{aq})+\mathrm{H}_{2}(\mathrm{~g})$
(b) (i) Complete the table below for this reaction

|  | Reactant or product | State | $\mathbf{M}_{\mathbf{r}}$ |
| :--- | :---: | :---: | :---: |
| Lithium |  |  |  |
| Water | reactant | liquid | 18.0 |
| Lithium hydroxide |  |  |  |
| Hydrogen |  |  |  |

(ii) Calculate the total mass of the reactants. Are these the same as the total mass of the products? Show your workings.

## - Bonding

Chemical reactions involve the breaking and making of bonds. This involves electrons being transferred or shared between atoms.
The total number of electrons at the end of the reaction must be the same as at the start.
Metal atoms lose electrons and form positively charged ions.
Non-metal atoms gain electrons and form negatively charged ions

> OR by sharing them (in pairs) with another non-metal atom
https://www.bbc.co.uk/bitesize/topics/z33rrwx (ionic compounds, small molecules, metals and alloys)
How do you know which type of bonding is present in an element or compound? Consider the type of element(s) it contains:

Q6. The electronic structure of a potassium atom is $2,8,8,1$
Draw a diagram to show the electronic structure of a potassium ion. Show the charge on the ion.

Q7. Complete the dot and cross diagram to show the electrons in the outer shells of ammonia, $\mathrm{NH}_{3}$. Use the periodic table to help you.

Q8. The diagrams shown an atom of magnesium and an atom of chlorine.

Magnesium

Chlorine

Describe, in terms of electrons, how magnesium atoms and chlorine atoms change into ions to produce Magnesium chloride, $\mathrm{MgCl}_{2}$.
You may draw labelled diagrams.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Unit 2: Practical Scientific Procedures and Techniques

In this unit you will be required to complete a lot of practical procedures and so it is important that you know about laboratory safety.

- Laboratory Safety
- Watch the video on safety in the laboratory: https://www.youtube.com/watch?v=RhlOYhOvCsQ
Use this to complete a list of safety rules to follow when completing any experiment.

1. 
2. 
3. 
4. 
5. 
6. 
7. $\qquad$
8. $\qquad$

You will be using a number of different chemicals and apparatus when completing these experiments.

- Follow the instructions provided to complete the table below on hazard symbols
i) Match the old hazard symbol to the new symbol.
ii) Match the new hazard symbol to the hazard name.
https://www.acs.org/content/dam/acsorg/about/governance/committees/chemicalsafety/publicati ons/acs-secondary-safety-guidelines.pdf (page 22 and 23)
iii) List the precautions which should be taken (in addition to wearing a labcoat and safety glasses) when handling chemicals with these hazards to minimise the chance of an accident occurring. https://www.acs.org/content/dam/acsorg/about/governance/committees/chemicalsafety/publicati ons/acs-secondary-safety-guidelines.pdf (pages 38-40)

| Name | Precautions |
| :---: | :---: |
| harmful / <br> irritant |  |
| oxidising <br> agent |  |
| flammable <br> harmful to <br> the <br> environment |  |
| corrosive <br> toxic |  |

(19)

## - Practical techniques

One of the practical techniques you will need to complete is the preparation of a standard solution and performing a titration to test the solution you have prepared.

- Watch these videos to help you answer the questions
https://www.youtube.com/watch?v=xBKyiXUhJy0
https://www.youtube.com/watch?v=rLc148UCT2w
https://www.youtube.com/watch?v=gzvzvDv BnA
Q1. (a) What is a standard solution?
(b) The diagram below shows the apparatus used to make a standard solution of sodium carbonate. Complete the labels.

(c) The standard solution prepared can be used to find the concentration of a solution of hydrochloric acid.

Figure 2.

(i) Complete the label to show name of the apparatus in which the acid is placed.
(ii) What is the name given to this procedure?
(iii) Figure 2. shows the level of the sodium carbonate solution in the burette at the start and the end of one titration. Use these to work out the volume of sodium carbonate added in the titration. Give your answer to 2 d.p:

Another practical technique you will need to complete is chromatography.

- The links below may help you to answer the questions on this technique.
https://www.youtube.com/watch?v=li5OWzhZSac
https://www.bbc.co.uk/bitesize/guides/z9dfxfr/revision/4
Q2. (a) What is chromatography used for? $\qquad$
(b) A student used paper chromatography to analyse a black food colouring. They placed spots of known food colours, $\mathbf{A}, \mathbf{B}, \mathbf{C}, \mathbf{D}$ and $\mathbf{E}$ and the black food colouring on a sheet of chromatography paper. They set up the apparatus as shown in Diagram 1.

Diagram 1

The student made two errors in setting up the apparatus. Identify the two errors and describe the problem each error would cause.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(c) A different student set up the apparatus without making any errors. The chromatogram in Diagram 2. shows the student's results.

## Diagram 2

(i) What do the results tell you about the composition of the black food colouring?
$\qquad$
$\qquad$
$\qquad$
(ii) Use Diagram 2. to complete Table 1.

## Table 1.

|  | Distance in $\mathbf{~ m m}$ |
| :--- | :---: |
| Distance from start line to solvent front |  |
| Distance moved by food colour $\mathbf{C}$ |  |

(iii) Use your answers in (c)(ii) to calculate the $R_{f}$ value for food colour $\mathbf{C}$. Show your workings.

$$
\mathrm{R}_{\mathrm{f}} \text { value }=
$$

$\qquad$
(iv) Table 2. gives the results of chromatography experiments that were carried out on some known food colours, using the same solvent as the students.

Table 2.

| Name of food colour | Distance from start line to <br> solvent front in $\mathbf{~ m m}$ | Distance moved by food <br> colour in $\mathbf{~ m m}$ | $\mathbf{R}_{\mathbf{f}}$ value |
| :---: | :---: | :---: | :---: |
| Ponceau 4R | 62 | 59 | 0.95 |
| Carmoisine | 74 | 45 | 0.61 |
| Fast red | 67 | 27 | 0.40 |
| Erythrosine | 58 | 17 | 0.29 |

Which of the food colours in Table 2. could be food colour C from the chromatogram? Give the reason for your answer.
$\qquad$
$\qquad$
$\qquad$

## - Obtaining and analysing results obtained in an experiment

It is important to keep a record of all data whilst carrying out practical work. It is good practice to draw a table before starting the experiment and then enter results straight into the table.
Tables should have clear headings with units.

| Time <br> $/$ min | Temperature <br> $/{ }^{\circ} \mathbf{C}$ |
| :---: | :---: |
| 0 | 27.6 |
| 1 | 27.4 |
| 2 | 27.2 |

The independent variable is the left-hand column in a table, with the following columns showing the dependent variables. All measurements should be written to the same number of decimal places (matching the precision of the measuring instrument).

## https://www.bbc.co.uk/bitesize/guides/zcxp6yc/revision/1 <br> https://www.bbc.co.uk/bitesize/guides/zcxp6yc/revision/6

Q3. A student was told to complete a practical to investigate how temperature affects the rate of a reaction. The student carried out the reaction at five different temperatures and recorded the time taken for each.
The student then calculated the rate of reaction, in $\mathrm{s}^{-1}$ for each experiment using the equation:
rate of reaction $=1$
time
The student's results and calculations are shown below:
at $24.5^{\circ} \mathrm{C}$ the experiment took 340 seconds
at $39.0^{\circ} \mathrm{C}$ it took 256 sec
at $58.0^{\circ} \mathrm{C}$ the experiment took 124 s
$80.5^{\circ} \mathrm{C} 62 \mathrm{~s}$
$51^{\circ} \mathrm{C} 186 \mathrm{~s}$

```
1/340=0.0029 s
1/256 = 0.0039 s
1/124=0.0081 s-1
1/62 = 0.0161
1/186=0.0054
```

(a) What is the independent variable in this experiment? Circle the correct answer

## rate of reaction

## time

(b) Tabulate the student's data in an appropriate manner.

| $\ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots / \ldots \ldots$. | $\ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots / \ldots \ldots$. | $\ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots / \ldots \ldots$ |
| :--- | :--- | :--- |
|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |

Drawing a graph of the results obtained usually makes it easier to interpret the data and draw conclusions. The independent variable is shown on the $x$-axis and the dependent variable is shown on the $y$-axis.
Axes should always be labelled with the quantity being measured and the units.

Data points should be marked with a cross, x .
When choosing the scales consider:

- the maximum and minimum values of each variable.
- whether 0,0 should be included as a data point.
- how to draw the axes without using difficult scale markings (e.g. multiples of 3,7 , etc)
- the data points should cover at least half of the grid supplied for the graph.

Consider the following when deciding where to draw a line of best fit:

- the line can be straight or curved
- the line should pass through, or very close to, the majority of plotted points (ignoring any anomalous points)
- for points not on the line make sure that there are as many points on one side of the line as the other
- the line should be continuous and drawn with a sharp pencil (use a rule for a straight line)
- the line will go through the origin $(0,0)$ if a value of 0 for the independent variable would produce a value of 0 for the dependent variable

Q4. A student investigated how the temperature of a metal block changed with time.
An electric heater was used to increase the temperature of the block.
The heater was place in a hole drilled in the block as shown in Figure 1.

The student measured the temperature of the metal block every 60 seconds. Table 3. shows the student's results.

Table 3.

| Time in s | ${\text { Temperature } \text { in }^{\circ} \mathbf{C}}^{\mathbf{0}}$ |
| :---: | :---: |
| 0 | 20.0 |
| 60 | 24.5 |
| 120 | 29.0 |
| 180 | 31.0 |
| 240 | 31.5 |

(a) Complete the graph of the data from Table 3. on Figure 2.

- Choose a suitable scale for the x-axis.
- Label the $x$-axis and label the $y$-axis.
- Plot the student's results.
- Draw a line of best fit.

Figure 2.

(b) Use the graph to find the temperature of the metal block at time 100 s .

$$
\text { Temperature at } 100 \mathrm{~s}=\ldots \ldots \ldots \ldots . .{ }^{\circ} \mathrm{C}(1)
$$

(c) The rate of change of temperature of the block is given by the gradient of the graph. Determine the gradient of the graph over the first 60 seconds.

## Part 2 - Highly Recommended

## BIOLOGY -

Use the resources below to support you in answering the questions

Cell Structure and
Function

Muscle Contraction

Nerve Transmission

Cell Structure and Function
Q1. Complete the table below with the functions of each structure in the eukaryotic cell

| Structure | Function |
| :--- | :--- |
| Plasma Membrane |  |
| Cytoplasm |  |
| Nucleus |  |
| Nucleolus |  |
| Rough Endoplasmic Reticulum |  |

| Golgi Apparatus |  |
| :--- | :--- | :--- |
| Vesicles |  |
| Lysosomes |  |
| Ribosomes |  |
| Centrioles |  |

## Tissue Structure and Function

Q2. With the aid of the diagram below, describe the process of muscle contraction

Q3.Complete the flowchart with descriptions of each stage of nerve signal transmission

| Stage |  | Description |
| :---: | :---: | :---: |
| Resting Potential |  |  |
| Depolarisation |  |  |
| Action Potential |  |  |
| Repolarisation |  |  |
| Hyperpolarisation |  |  |
| Nerve <br> Transmission |  |  |

## RESEARCH (preview)

Research the use of optical fibres in medicine with endoscopes:
Use the following resources to help you:

Pages 29-31

How an endoscope works. An outline of things you can include in your description is below:

- A diagram of an endoscope
- Two uses of endoscopes in medicine or other applications
- How total internal reflection is used in endoscopy
- How the object is illuminated with the endoscope
- How the image from the object is propagates to the detector
- How bundles of fibres are used in endoscopy
- How the design of an endoscope affects the resolution of the image

## CHEMISTRY -

Make notes from the following resources, then have a go at completing the questions

## Titrations and mole calculations

https://www.bbc.co.uk/bitesize/guides/zx98pbk/revision/3

## https://www.youtube.com/watch?v=ovx-Sro4NXM

Q1. This question is about acids and alkalis.
(a) Dilute hydrochloric acid is a strong acid.

Explain why an acid can be described as both strong and dilute.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

A student titrated $25.0 \mathrm{~cm}^{3}$ portions of dilute sulfuric acid with a $0.105 \mathrm{~mol} / \mathrm{dm}^{3}$ sodium hydroxide solution.
(c) The table below shows the student's results.

|  | Titration <br> $\mathbf{1}$ | Titration <br> $\mathbf{2}$ | Titration <br> $\mathbf{3}$ | Titration <br> $\mathbf{4}$ | Titration <br> $\mathbf{5}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Volume of <br> sodium <br> hydroxide <br> solution in $\mathrm{cm}^{3}$ | 23.50 | 21.10 | 22.10 | 22.15 | 22.15 |

The equation for the reaction is:

$$
2 \mathrm{NaOH}+\mathrm{H}_{2} \mathrm{SO}_{4} \rightarrow \mathrm{Na}_{2} \mathrm{SO}_{4}+2 \mathrm{H}_{2} \mathrm{O}
$$

Calculate the concentration of the sulfuric acid in mol/dm ${ }^{3}$

## Use only the student's concordant results.

Concordant results are those within $0.10 \mathrm{~cm}^{3}$ of each other.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Concentration of sulfuric acid $=$ $\qquad$ $\mathrm{mol} / \mathrm{dm}^{3}$
(d) Explain why the student should use a pipette to measure the dilute sulfuric acid and a burette to measure the sodium hydroxide solution.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(e) Calculate the mass of sodium hydroxide in $30.0 \mathrm{~cm}^{3}$ of a $0.105 \mathrm{~mol} / \mathrm{dm}^{3}$ solution.

Relative formula mass $\left(M_{r}\right): \quad \mathrm{NaOH}=40$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Mass of sodium hydroxide =

Q2. A student investigated the reactions of copper carbonate and copper oxide with dilute hydrochloric acid.

In both reactions one of the products is copper chloride.
(a) Describe how a sample of copper chloride crystals could be made from copper carbonate and dilute hydrochloric acid.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(b) A student wanted to make 11.0 g of copper chloride.

The equation for the reaction is:

$$
\mathrm{CuCO}_{3}+2 \mathrm{HCl} \rightarrow \mathrm{CuCl}_{2}+\mathrm{H}_{2} \mathrm{O}+\mathrm{CO}_{2}
$$

Relative atomic masses, $A_{r}: \mathrm{H}=1 ; \mathrm{C}=12 ; \mathrm{O}=16 ; \mathrm{Cl}=35.5 ; \mathrm{Cu}=63.5$
Calculate the mass of copper carbonate the student should react with dilute hydrochloric acid to make 11.0 g of copper chloride.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Mass of copper carbonate $=$ g
(c) The percentage yield of copper chloride was $79.1 \%$.

Calculate the mass of copper chloride the student actually produced.
$\qquad$
$\qquad$
Actual mass of copper chloride produced $=$ g

## Exam style questions

Q1. (a) sound
(b) (visible) light
(c) cooking food
(d) 1.2 gigahertz
(e) $300000 \times 1000=300000000 \mathrm{~m} / \mathrm{s}$
(f) wave speed $=$ frequency $\times$ wavelength allow $v=f \lambda$
(g) $300000000=1200000000 \times \lambda$ an answer of 0.25 scores 3 marks

$$
\lambda=\frac{300000000}{1200000000} \quad \begin{aligned}
& \text { allow ecf from (e) }
\end{aligned}
$$

$$
\lambda=0.25(\mathrm{~m})
$$

Q2.
(a) radio
(b)

award 1 mark for each correct line if more than one line is drawn from any em wave then none of those lines gain credit
(c) ionising

## SOLUTIONS TO CHEMISTRY

## Periodicity and properties of elements

## Atomic Structure

Q1. Figure 1 shows an atom of element G.
Figure 1
Draw a ring around the correct answer to complete each sentence.
(a) Label A shows

> an electron an ion a nucleus
(b) Label B shows an isotope a molecule a neutron
(c) The atomic number of element $\mathbf{G}$ is (5) $61011161 \begin{gathered}\text { number of } \\ \text { protors }\end{gathered}$
(d) The mass number of element $\mathbf{G}$ is
56
10
(11) 16
5 protions + Enentrous

## $\square$ Periodic Table

https://www.bbc.co.uk/bitesize/guides/ztv797h/revision/2 (pages 2-8)
https://www.rsc.org/periodic-table/
Q2. The Periodic table below contains six errors. Highlight these.

Q3. Complete the labels on the diagram below using the following terms:

Q4. Read the information below on element $\mathbf{X}$ carefully. Use this to help you answer the questions which follow.

Element $\mathbf{X}$ has two different isotopes, both of which contain 17 protons. The least abundant isotope contains 20 neutrons. The second isotope is three time more abundant and contains 2 more neutrons. All the atoms contain 2 electrons in the first shell, 8 electrons in the second shell and 7 electrons in the third.
(a) Where in the Periodic Table is element X found:

Group: $\qquad$ . Period: $\qquad$
(b) Use the Periodic Table in Q3. the key and your answer to Q4.(a) to complete Figure 2. for element X

(c) Is element $\mathbf{X}$ a metal or non-metal? .......nan-...netal.
(d) Identify an element, in the same group as $\mathbf{X}$, which has a lower boiling point.
........Flmorine

Q5. Lithium reacts with water to form lithium hydroxide and hydrogen.
(a) Balance the symbol equation for this reaction

$$
\text { ..2. } \mathrm{Li}(\mathrm{~s})+\ldots 2 . \mathrm{H}_{2} \mathrm{O}(\mathrm{l}) \rightarrow \ldots 2 \ldots \mathrm{LiOH}(\mathrm{aq})+\mathrm{H}_{2}(\mathrm{~g})
$$

(b) (i) Complete the table below for this reaction

|  | Reactant or product | State | $\mathbf{M}_{\mathbf{r}}$ |
| :--- | :---: | :---: | :---: |
| Lithium | reactant | soid | 18.0 |
| Water | reactant | liquid | 18.0 |
| Lithium hydroxide | product | aevecus (solutan) | 23.9 |
| Hydrogen | product | gas | 20 |

(ii) Calculate the total mass of the reactants. Are these the same as the total mass of the products? Show your workings.
$\ldots(2 \times 6.9)+(2 \times 18.0) \ldots \ldots . .49 .8$.........total mass.9f..reactants...........................)..

Q6. The electronic structure of a potassium atom is $2,8,8,1$ lost the I cuter $e^{-}$
Draw a diagram to show the electronic structure of a potassium ion. Show the charge on the ion.

Q7. Complete the dot and cross diagram to show the electrons in the outer shells of ammonia, $\mathrm{NH}_{3}$. Use the periodic table to help you.

Q8. The diagrams shown an atom of magnesium and an atom of chlorine.

Magnesium

Describe, in terms of electrons, how magnesium atoms and chlorine atoms change into ions to produce Magnesium chloride, $\mathrm{MgCl}_{2}$.
You may draw labelled diagrams.

a)

.t...leses.a. a ind. (1)...to...a.. and (1) Cl...atram

## Unit 2: Practical Scientific Procedures and Techniques

In this unit you will be required to complete a lot of practical procedures and so it is important that you know about laboratory safety.

## Laboratory Safety

- Watch the video on safety in the laboratory: https://www.youtube.com/watch?v=RhlOYhOvCsQ

Use this to complete a list of safety rules to follow when completing any experiment.

1. .. Wens..a..Lab caat.. (busttossed.sup).
2. .Wear.safehy.g.anere/-grigglen
3. ..Tie. bads lang. hair... (particubang. whan wads. an Bunsen.burme...).
4. Winte a nisk. amemment (bejare yarocompalete. the practical).
5. .Kerp..the..lab.tidry.
6. .hipenuprspritager

## Practical techniques

One of the practical techniques you will need to complete is the preparation of a standard solution and performing a titration to test the solution you have prepared.

- Watch these videos to help you answer the questions
https://www.youtube.com/watch?v=xBKyiXUhJy0
https://www.youtube.com/watch?v=rLc148UCT2w
https://www.youtube.com/watch?v=gzvzvDv BnA

...cencentratian.
(b) The diagram below shows the apparatus used to make a standard solution of sodium carbonate. Complete the labels.

(c) The standard solution prepared can be used to find the concentration of a solution of hydrochloric acid.

Figure 2.

(i) Complete the label to show name of the apparatus in which the acid is placed.
(ii) What is the name given to this procedure?
(iii) Figure 2. shows the level of the sodium carbonate solution in the burette at the start and the end of one titration. Use these to work out the volume of sodium carbonate added in the titration. Give your answer to 2 d.p.

$$
24.50-2.35
$$

Volume $\mathrm{Na}_{2} \mathrm{CO}_{3}(\mathrm{aq})$ added $=$
8
...22..15 $\qquad$ $\mathrm{cm}^{3}$ (1)

## 2 numbers afte

 the decimal pointQ2. (a) What is chromatography used for? ....to. separate.... (and anahbyse)...companents.... ..in...a.mixtures
(b) A student used paper chromatography to analyse a black food colouring. They placed spots of known food colours, A, B, C, D and E and the black food colouring on a sheet of chromatography paper. They set up the apparatus as shown in Diagram 1.

Diagram 1

The student made two errors in setting up the apparatus. Identify the two errors and describe the problem each error would cause.
...Stan Line drams. in ink
..........s. it will .usu. . dissolve in the solvent $\qquad$
... Solvent. aborese the start Line.../.spots .mender the . solvent $\qquad$ (1.)
...........so. they will wash. of. the porpse./.mix...with the solverst............(i).
$\qquad$
(c) A different student set up the apparatus without making any errors. The chromatogram in Diagram 2. shows the student's results.

Diagram 2

(i) What do the results tell you about the composition of the black food colouring?

(ii) Use Diagram 2. to complete Table 1.

Table 1.

|  | Distance in mm |  |
| :--- | :---: | :---: |
| Distance from start line to solvent front | $28.5 / 29$ |  |
| Distance moved by food colour $\mathbf{C}$ | allow $11-12$ |  |

(iii) Use your answers in (c)(ii) to calculate the $\mathrm{R}_{\mathrm{f}}$ value for food colour C . Show your workings. distance mored byc
distance from stat line to sdvent front $\quad R_{f}$ value $=.0 .38 .8 .-0.42$
(iv) Table 2. gives the results of chromatography experiments that were carried out on some known food colours, using the same solvent as the students.

Table 2.

| Name of food colour | Distance from start line to <br> solvent front in $\mathbf{~ m m}$ | Distance moved by food <br> colour in $\mathbf{~ m m}$ | $\mathbf{R}_{\mathbf{f}}$ value |
| :---: | :---: | :---: | :---: |
| Ponceau 4R | 62 | 59 | 0.95 |
| Carmoisine | 74 | 45 | 0.61 |
| Fast red | 67 | 27 | 0.40 |
| Erythrosine | 58 | 17 | 0.29 |

Which of the food colours in Table 2. could be food colour C from the chromatogram? Give the reason for your answer.
........fast. red......(r.) $\qquad$ allaw nonene
.......has.same...xempsinsilou...Rf ...b.). $\qquad$ sauss.an amy.

Q3. A student was told to complete a practical to investigate how temperature affects the rate of a reaction. The student carried out the reaction at five different temperatures and recorded the time taken for each.
The student then calculated the rate of reaction, in $\mathrm{s}^{-1}$ for each experiment using the equation:

$$
\text { rate of reaction }=\frac{1}{\text { time }}
$$

The student's results and calculations are shown below:

```
at 24.5}\mp@subsup{}{}{\circ}\textrm{C}\mathrm{ the experiment took 340 seconds
at 39.0 %}\textrm{C}\mathrm{ it took 256 sec
at }58.0\mp@subsup{0}{}{\circ}\textrm{C}\mathrm{ the experiment took 124 S
80.5 '}\textrm{C}62
51.}\textrm{C}186
```

```
1/340 = 0.0029 5-1
```

1/340 = 0.0029 5-1
1/256=0.0039 5-1
1/256=0.0039 5-1
1/124=0.0081 5-1
1/124=0.0081 5-1
1/62 = 0.0161
1/62 = 0.0161
1/186=0.0054

```
1/186=0.0054
```

(a) What is the independent variable in this experiment? Circle the correct answer
rate of reaction time temperature
(b) Tabulate the student's data in an appropriate manner.

| tempeca.tur......../......................... | rate.sf.reastian.......s.. |  |
| :---: | :---: | :---: |
| 24.5 | 340 | 0.0029 |
| 39.0 | 256 | 0.0039 |
| 51.0 | 186 | 0.0054 |
| 58.0 | 124 | 0.0081 |
| 80.5 | 62 | 0.0161 |

caret headings (1)
units with headings ally (i)

Figure 2.

(b) Use the graph to find the temperature of the metal block at time 100 s .

$$
\begin{aligned}
& \text { must match curve / line drawn. Temperature at } 100 \mathrm{~s}=2.2 .3 . . . .{ }^{\circ} \mathrm{C}(1) \\
& \text { write to id p to match } \\
& \text { precision in table }
\end{aligned}
$$

(c) The rate of change of temperature of the block is given by the gradient of the graph. Determine the gradient of the graph over the first 60 seconds.
.... 24.5 .0 . $=0.41 \ldots(1)$ $\qquad$ ........60-0 (1) $\qquad$
$\qquad$
$\qquad$
Gradient $=$ $\qquad$ Q. 41 $\qquad$ ${ }^{\circ} \mathrm{C} / \mathrm{s}(2)$

## Highly recommended content

Q1. (a) (strong because) completely ionised (in aqueous solution)
ignore pH
allow dissociated for ionised
do not accept hydrogen is ionising
do not accept $\mathrm{H}^{+}$are ionised
(dilute because) small amount of acid per unit volume
ignore low concentration
(c) (titre):
chooses titrations 3, 4, 5
average titre $=22.13\left(\mathrm{~cm}^{3}\right)$
allow average titre $=22.13(3 \ldots)\left(\mathrm{cm}^{3}\right)$
allow a correctly calculated average from an incorrect
choice of titrations
(calculation):
(moles $\mathrm{NaOH}=$

$$
\left.\frac{22.13}{1000} \times 0.105=0.002324\right)
$$

allow use of incorrect average titre from step 2
(moles $\mathrm{H}_{2} \mathrm{SO}_{4}=$
$1 / 2 \times 0.002324=$ ) 0.001162
allow use of incorrect number of moles from step 3
(concentration $=$
$\frac{0.001162}{25} \times 1000$ )
$=0.0465\left(\mathrm{~mol} / \mathrm{dm}^{3}\right)$
allow use of incorrect number of moles from step 4
alternative approach for step 3, step 4 and step 5
$\frac{2}{1}=\frac{22.13 \times 0.105}{25.0 \times \text { conc. } \mathrm{H}_{2} \mathrm{SO}_{4}}$ (1)
(concentration $\mathrm{H}_{2} \mathrm{SO}_{4}=$ )
$\underline{22.13 \times 0.105}$
$25.0 \times 2$
$=0.0465\left(\mathrm{~mol} / \mathrm{dm}^{3}\right)(1)$
an answer of 0.046473 or 0.04648 correctly rounded to at least 2 sig figs scores marking points 3, 4 and 5
an answer of 0.092946 or 0.09296 or 0.185892 or 0.18592
correctly rounded to at least 2 sig figs scores marking points 3 and 5
an incorrect answer for one step does not prevent
allocation of marks for subsequent steps
(d) pipette measures a fixed volume (accurately)
(but) burette measures variable volume allow can measure drop by drop
(e) $($ moles $=) \frac{30}{1000} \times 0.105$ or 0.00315 (mol)
or
(mass per $\mathrm{dm}^{3}=$ ) $0.105 \times 40$
or 4.2 ( g )
$\left(\right.$ mass $\left.=\frac{30}{1000} \times 0.105 \times 40\right)$
$=0.126(\mathrm{~g})$
an answer of $0.126(\mathrm{~g})$ scores 2 marks an answer of 126(g) scores 1 mark an incorrect answer for one step does not prevent allocation of marks for subsequent steps

Q2.
(a) add excess copper carbonate (to dilute hydrochloric acid)
accept alternatives to excess, such as 'until no more reacts'
filter (to remove excess copper carbonate)
reject heat until dry
heat filtrate to evaporate some water or heat to point of crystallisation accept leave to evaporate or leave in evaporating basin
leave to cool (so crystals form)
until crystals form
must be in correct order to gain 4 marks
(b) $M_{r} \mathrm{CuCl}_{2}=134.5$
correct answer scores 4 marks
moles copper chloride $=\left(\right.$ mass $\left./ M_{r}=11 / 134.5\right)=0.0817843866$
$\mathrm{Mr}_{\mathrm{r}} \mathrm{CuCO}_{3}=123.5$
